

CYNDY'S SWEETTOOTH BUSINESS CASE

PROBLEM STATEMENT:

The Cyndy's Sweettooth, a fast-growing local bakery located at Harmony Estate, Port Harcourt currently relies on manual methods and notebooks to manage customers' orders, track inventory and record daily sales.

These processes are prone to error and time consuming. It is difficult to monitor stock levels, identify best-selling products and generate accurate sales reports. Customers currently place orders in person or by phone, this increases the risk of missed or incorrect orders and limit convenience. All these causes the bakery to experience inefficiencies in production, shortage of ingredients, lost sales opportunities and reduced repeated customers.

An online app that allows customers to digitally place orders, enables the management of inventory and sales tracking and to gain better visibility into the business performance is needed.

PROPOSED SOLUTION:

The proposed solution is a simple web-based application that enables digital customer ordering and centralized management of sales and inventory. The app will reduce manual errors, improve visibility into business performance, and support more efficient bakery operations.

COSTS:

Item	Description	Estimated Cost (₦)
App Design and Development	Web-based app (ordering, inventory, sales reporting)	₦400,000
UI/UX Design	Basic user-friendly interface	₦150,000
Testing & Quality Assurance	Functional testing before launch	₦100,000
Domain & Hosting (1st year)	Website domain + hosting	₦50,000
Initial Training	Owner/staff onboarding	₦50,000

Total One-Time Cost: ₦750,000

Recurring Costs (Annual)

Cost Item	Estimated Annual Cost (₦)
Hosting & Maintenance	₦100,000
Minor Enhancements & Support	₦100,000

Total Annual Recurring Cost: ₦300,000

EXPECTED BENEFITS:

Tangible Benefits:

BENEFITS	DESCRIPTION	ESTIMATED IMPACT
Increased Sales	Online ordering improves accessibility	₦300,000/year
Reduced Waste	Better inventory tracking reduces overproduction	₦200,000/year
Reduced Order Errors	Fewer incorrect/missed orders	₦100,000/year
Time Savings	Less manual record keeping	₦150,000/year

Total Estimated Annual Financial Benefit: ₦750,000

Intangible Benefits:

- Improved customer satisfaction and convenience
- Better visibility into best-selling products
- Improved decision-making using sales data
- Stronger brand presence through online ordering
- Foundation for future growth (delivery, promotions, loyalty programs)

RISKS, IMPACT AND MITIGATION:

RISKS	IMPACT	MITIGATION
Low customer adoption	Reduced ROI	Simple UI, staff assistance, in-store promotion
Technical issues	Order delays	Proper testing before launch
Internet downtime	Temporary disruption	Offline fallback for in-store orders
Budget overrun	Increased cost	Clearly defined scope and phased delivery
Resistance to change	Slow usage	Training and gradual rollout

TIMELINE:

PHASE	ACTIVITIES	DURATION
Initiation & Planning	Requirements gathering, scope definition	1 week
Design	UI/UX and process design	2 weeks
Development	App development	4 weeks
Testing	Functional and user testing	1 week
Deployment & Training	Go-live and staff onboarding	1 week

Total Estimated Timeline: 9 weeks

OVERALL BUSINESS CASE SUMMARY:

- **Initial Investment:** ~~~N~~750,000
- **Annual Benefits:** ~~~N~~750,000
- **Payback Period:** ~12–18 months
- **Strategic Value:** High (efficiency, scalability, customer satisfaction)
